PROCEDURE OF REVALUATION PROGRAM

Land

The accompanying rate base is a guide to determining value. Special cases are treated as they arise through the use of percentage increases or decreases on the value of the plot as arrived at by use of the schedule.

Dwellings

All dwellings are computed at a base price of $0.60 per cubic foot for finished area and basement. From this base price is subtracted the percentage depreciation figure from the accompanying schedule.

Procedure for cubing a home:

1. Basement — Full cellar is computed at 7 ft. high times the area. Partial cellar is computed at actual area as measured on outside of building; and if height is not full, it is estimated at anywhere from 2 to 7 ft.
2. First story — area times 8 ft. high.
3. Second story — actual area times 8 ft.
4. Third story — actual area times 8 ft.

If a story is not full the pitch determines the height to be anywhere from 2 to 7 ft.

Open porches are not included in survey. Finished closed in porches are included at same price as actual building.

Special features on any dwelling such as expensively constructed open porches, finished basement playrooms and dwellings which are so expensively constructed as to fall outside the $0.60 cu. ft. figure shall be treated as they arise.

Outbuildings

Garages, barns, sheds and henneries shall be treated according to the accompanying price schedule.

Mercantile Property

Mercantile Property shall be treated according to accompanying price schedule and depreciation schedule for this type of property.

Repair Shops, Garages and Gas Stations

These shall be treated according to accompanying price schedule for this type building. Depreciation schedule is the same as is used for Mercantile Buildings.

Warehouses and Large Industrial Garages and Shops

These special case buildings shall be figured at anywhere from $0.25 per foot to $2.00 per foot depending on type of construction and general condition. The relationship of this square foot price should correspond closely to the price of similarly constructed buildings in this class.

OUTBUILDINGS

Barns and garages, henneries and storage sheds are figured according to the below price schedule based on type of construction, condition and size. Actual condition is an estimate by the appraiser. All stories above first stories are figured at one-half of the additional height .

Condition	Brick	Block	Clapboard or Wood Shingle	Asphalt Siding	Board
Excellent	1.40	1.10	1.00	.80	.80
Good	1.20	.90	.80	.60	.60
Fair	1.00	.70	.60	.50	.40
Poor	.60	.40	.20	.20	.20
Very Poor	.40	.30			
			None on Small Bldgs. 10c on Large Barns	None on Small Bldgs. 10c on Lge. Barns	

To values arrived at by above schedule

ADD:

Utility Value	
Concrete Floors	$50 for good storage shed
Heat	$50 for each garage stall
Finished Interior	$0.10 per sq. ft. (0.20 sq. ft. for large barns)
Doors	$0.10 sq. ft.
	$0.20 sq. ft.
	$50 each good overhead door

SUBTRACT:

Garages	10% for two stall garage
	20% for three or more stall garage
Outbuildings	$20 per door when stall is open
	20% for buildings over 900 sq. ft. except large livestock barns

All buildings are subject to depreciation for public works as applied to dwellings. Make all additions before subtractions.
